Guru Nanak
COLLEGE DEHRADUN
NAAC ACCREDITED

Bachelor of Audiology & Speech Language Pathology (BASLP)

The Bachelor of Audiology & Speech-Language Pathology (BASLP) is a four-year undergraduate program that focuses on the study of hearing, speech, and communication sciences. It equips students with strong theoretical knowledge, clinical skills, and practical experience to understand and manage hearing impairments, speech and language disorders, and related communication challenges. The BASLP program emphasizes both academic learning and hands-on clinical training, enabling students to develop scientific reasoning, diagnostic abilities, therapeutic competencies, and rehabilitation techniques. Core subjects include anatomy and physiology of speech and hearing.

About Us

Guru Nanak College is one among the leading Institutions of India, situated in the serene & academically vibrant city of Dehradun, has established itself as a prestigious centre of higher education since its inception under the aegis of NIMS, Dehradun, a leading educational group since 2009. The college has become a top college in the region because of its expertise in studies. It has gained recognition as one of the most prestigious college in Dehradun despite its short history.

Guru Nanak College's culture is deeply committed to nurturing the development of the next generation of Pharmaceutical professionals, Paramedics, & Nurses. This commitment goes beyond just teaching academic excellence. Through its diverse course offerings, it advocates for the belief that education is a crucial factor in personal & societal advancement.

Guru Nanak College's collaboration with Career Buddy Club (CBC) is a special feature that distinguishes it from other colleges. CBC is a Dubai-Based firm known for its extensive career guidance & mentoring. The college's commitment to career readiness has resulted in a remarkable job placement, rate of up to 100% for graduates due to this partnership. The collaborations with CBC India & CBC Dubai further expand employment possibilities. India Accelerator's partnership exemplifies the college's commitment to developing entrepreneurial talent among students, which can help transform innovative ideas into successful ventures.

Affiliation

The Bachelor of Audiology & Speech-Language Pathology (BASLP) program is affiliated with HNB Uttarakhand Medical Education University (HNBUMU) and recognized by the Ministry of Human Resource Development (HRD), Government of India.

Career Opportunities

- Clinical audiologists work in hospitals, private clinics, and diagnostic centers to evaluate and treat patients with hearing loss and other auditory disorders. They use advanced diagnostic tools and work closely with ENT specialists to develop tailored treatment plans.

- These professionals focus on treating communication disorders, helping patients with speech, language, and swallowing difficulties. They often work in schools, rehabilitation centers, and hospitals.

- Pediatric audiologists specialize in diagnosing and treating hearing and speech disorders in children. Their role is crucial in early intervention, ensuring that developmental milestones are met.

- For those inclined towards research and education, a career in academia offers opportunities to contribute to advancements in audiology. This role involves conducting clinical studies, publishing research, and teaching future audiologists.

- Hearing aid specialists work with patients to select, fit, and fine-tune hearing aids. They play a critical role in ensuring that individuals with hearing loss regain quality of life through improved hearing.

- Rehabilitation specialists help patients adapt to hearing loss through therapies that improve auditory processing and communication skills. They are essential in comprehensive patient care plans.

- Corporate audiology consultants work with organizations to design and implement hearing conservation programs, assess workplace noise levels, and ensure employee health and safety.

Research opportunities

- Adult & Pediatric Audiology: Diagnose and treat hearing and balance disorders across all ages using advanced tech, rehabilitation, and personalized care.
- Auditory Development in Children: Study how infants and children process sound and speech, focusing on early experiences, brain responses, and risk identification for learning disorders.
- Auditory Assessment & Electrophysiology: Objectively evaluate auditory system function and monitor interventions like hearing aids and auditory training.
- Auditory Attention & Neuroscience: Explore how the brain focuses on relevant sounds, separates speech from noise, and links sound to cognition using EEG/MEG.
- Augmentative & Alternative Communication (AAC): Develop systems and interventions to support or replace speech for individuals with complex communication needs.
- Cognitive-Communication Disorders: Assess and treat communication problems caused by underlying cognitive deficits.
- Autism Spectrum Disorders: Study causes, improve early diagnosis, explore neural mechanisms, and provide personalized interventions across lifespan.
- Language Development & Disorders in Children: Focus on speech, grammar, vocabulary, and social use to identify and manage developmental language disorders early.
- Motor Speech Disorders in Adults: Refine diagnostics, explore tech-based interventions, and understand psychosocial impacts.
- Stuttering, Fluency & Sensorimotor Control: Investigate neurological bases, sensory feedback, and motor control deficits in stuttering.
- Social Communication: Study verbal and nonverbal interactions across personal, group, and media contexts to understand human communication.
